TECHNICAL SHEET

IDENTIFICATION DATAS

NAME OF THE PRODUCT

LAVATELONI

DESCRIPTION

Bicomponent detergent for pre washing and for external washing of vans and trucks

PROPERTIES

LAVATELONI, a pleasantly scented liquid detergent for washing and pre washing vehicles, is strongly recommended for removing quickly any kind of dirt from trucks and vans. At the recommended concentrations, LAVATELONI does not corrode the paints, the aluminium, the chromework, nor the plastic parts even the regenerated ones. LAVATELONI, thanks to its surface-active agents, has a total action separating and emulsifying the dirt very quickly.

PHYSICAL CLASSIFICATION

State	Bicomponent liquid
Colour	Clear/Pink
Scent	Typical
Solubility in water	Total
pH T.Q.	13 ca.
Density	1.115 Kg/L
Chemical classification	Non ionic cationic solution

USAGE

The best dilution of LAVATELONI is achieved in concentration between 1% and 2%, according to the external temperature and the state of the vehicle. In the summer time, if necessary, cool down the vehicle with cold water. In order to homogenize the components, shake the product before the use.
